Internship

NULLCLASS, *Web Development Intern*   01/2024 – 03/2024
- Developed a responsive front-end image gallery using HTML, CSS, and JavaScript, featuring an intuitive user interface with thumbnail navigation for an enhanced user experience.
- Implemented interactive elements, including image zoom functionality and pagination, showcasing proficiency in web development and design principles during the internship at Nullclass platform.

Projects

React Bill Craft ⬈   12/2023
- ReactBillCraft streamlines the invoicing process, providing a user-friendly interface built with React for quick and easy generation of professional invoices.
- This project allows users to customize their invoices with ease, offering a range of options to tailor the appearance and details of each invoice to meet individual business needs.
- With a responsive design and reliable functionality, ReactBillCraft ensures a seamless experience across devices, making it a dependable tool for businesses to manage their invoicing efficiently.

Portfolio Website (11/23) ⬈   11/2023
- Employing HTML, CSS, and JavaScript, the portfolio website features a visually appealing and interactive design. The combination of HTML for structuring content, CSS for styling, and JavaScript for dynamic elements results in a seamless and engaging user experience
- The website incorporates a responsive layout, ensuring compatibility across various devices and screen sizes. Through carefully crafted CSS media queries and flexible design principles, the portfolio seamlessly adapts to the user's device, whether it's a desktop, tablet, or mobile phone.
